HASIACI PRÍSTROJ

PRILBA

Hasič

Každý deň zasahujú v rôznych situáciách. Musia byť silní, odvážni a odolní. Hasiči sú vo dne i v noci pripravení a čakajú na zavolanie.

Hasičské auto

Vozí rebríky, hadice a ďalšie potrebné vybavenie. Vďaka čerpadlu a hadiciam dokáže vodu vystrekovať na veľkú vzdialenosť.

Hasičská stanica

Je základňou pre hasičov a ich vozidlá. Na stanici musí byť neustále niekoľko hasičov, a preto majú vnútri postele, kuchyňu i sprchy.

Alarm

Keď sa na stanici rozoznie alarm, musia hasiči okamžite vyraziť do akcie.

Špeciálna výbava

Hasenie požiaru môže zabráť hodiny a niekedy i celé dni. Hasiči na ochranu pred plameňmi nosia helmy, protipožiarne obleky a dýchacie prístroje.

Helma

Pevná helma má štít na tvár a ochranu zátylku.
